FOUNDER'S MESSAGE

GREETINGS

"More Than Courses — We Build Futures"

Dear Students & Parents,

When we started Jains Computer, our vision was simple — to make every student truly skillful, confident, and ready for the real world.

Today, after 25+ years, our mission remains the same. We're not just here to teach software or design — we're here to guide dreams, build confidence, and help every student find their path to success.

To every parent — thank you for trusting us with your child's future.

To every student — we're with you, every step of the way.

Let's create something meaningful, together.

Sanmati Jain
(Director)

STUDENT STORIES & FEEDBACK

ANKIT KUMARWAT

"The Graphic Designing course experience here was truly the best. I received practical training, a friendly environment, and support at every step. Whenever I faced any difficulty, Aadish Sir was always there to help – just like a friend!"

DIYA KHOSLA

"I completed both Interior Design and Digital Marketing from Jains Computer, and the experience was truly amazing. The atmosphere was super positive, and I got great opportunities to explore real market work. I highly recommend this institute!"

HEMANT SHARMA

"I'm now working as a Senior Developer in a web development company, and it all started here. Jains Computer gave me a proper learning path, step-by-step guidance, and the confidence I needed. Today, I feel stable and proud of my journey."

JATIN KUMARWAT

"I completed the Interior and Architecture Design course from Jain's Computer. Rajat Sir taught us really well and cleared all our doubts with patience. I even got placed after the course! I highly recommend everyone to join and start their journey here."

DATA ANALYTICS

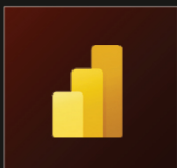

Python for Data Analysis

Build a strong foundation in Python — from data cleaning to visualizations using libraries like Pandas, NumPy, and Matplotlib.

Advanced Excel Techniques

Go beyond formulas: Pivot tables, dashboards, data automation, and real-time tracking.

Power BI Reporting

Design beautiful, interactive dashboards and reports with real-time business data.

AI Tools for Smart Analysis

Use ChatGPT, Excel AI, and other automation tools to interpret, summarize, and present data faster than ever.

PROGRAMMING

Programming with AI teaches students how to build smart apps and tools using Python and AI — skills used by top tech companies. It's the perfect course to stand out, unlock global opportunities, and secure a future-ready career.

C Programming

Logic Building Starts Here

C builds your programming base with strong logic, memory handling, and structured coding — ideal for beginners.

C++ Programming

Learn OOP Concepts

Master object-oriented programming with C++ and understand how real-world software is structured.

Python Programming

Code Smart & Fast

An easy, powerful language used in automation, web apps, and AI — perfect for modern development.

DIGITAL MARKETING

Social Media Marketing & Content

Master Instagram, Facebook & LinkedIn to grow real businesses. Learn content planning, reel creation, viral campaigns & audience building.

E-Commerce Marketing

Promote Shopify, Wix Studio & local stores. Learn product setup, discount strategy, retargeting ads, and sales funnel creation.

Performance & YouTube Ads

Run powerful ad campaigns on Meta, Google & YouTube. Learn targeting, budget setup, A/B testing, and ad optimization to boost conversions.

Ad Creatives & AI Tools For Conversions

Design scroll-stopping ad creatives using tools like Illustrator, Photoshop & AI tools (like ChatGPT & Copy.ai) to maximize conversions.

SEO & Keyword Research

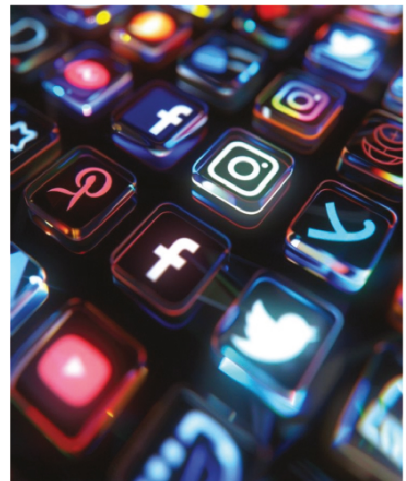

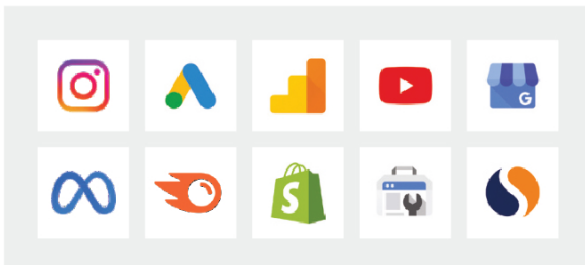

Rank websites on Google through keyword research, on-page & off-page SEO, backlinks, and competitor analysis for long-term traffic.

Market Analysis & Freelancing

Understand target audiences, run competitor analysis, identify trends, and handle real client projects — from pitching to delivery.

Email Marketing & Funnels

Create professional email campaigns, build automation funnels, boost engagement, and convert cold leads into loyal customers.

VIDEO EDITING & PRODUCTION

✓ Editing Techniques & Story Flow

Learn the art of cutting, trimming, and sequencing clips to build a smooth and engaging narrative. You'll master timeline control, transitions, pacing, J & L cuts, and montage styles — essential for storytelling.

✓ Motion Graphics & Effects

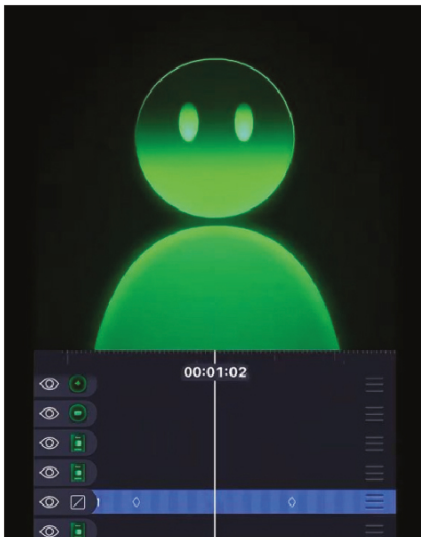

With After Effects, bring your videos to life using animated titles, lower thirds, visual effects, logo reveals, tracking, masking, and kinetic typography. Learn how motion graphics create a professional polish every editor must master.

✓ Color Grading & Visual Style

Understand how to enhance the mood of your video using color correction and creative grading. Learn to use Lumetri Color in Premiere Pro to balance skin tones, match shots, and build cinematic looks that stand out.

✓ Export, Formats & Content Optimization

Learn the right settings to export high-quality videos for Instagram reels, YouTube, ads, and client projects. Understand frame rates, codecs, resolutions, and aspect ratios so your videos always look their best on every platform.

GRAPHIC DESIGN & BRANDING

Design Foundations

Learn core concepts like typography, color theory, layout, balance, and alignment — the backbone of all professional designs.

Brand Identity Design

Design complete brand kits: logos, color palettes, business cards, and packaging for real-world brands.

Mastering Tools

Hands-on training in Adobe Illustrator, Photoshop, and CorelDRAW to confidently design logos, posters, and more.

Digital & Print Graphics

Create professional social media creatives, posters, banners, brochures, and print-ready designs with industry standards.

Creative Thinking

Develop your visual imagination and storytelling ability to turn ideas into designs that leave a lasting impact.

Portfolio & Career Prep

Build a powerful design portfolio and gain the skills needed to freelance, work with agencies, or get placed in creative roles.

UI / UX & WEBSITE DEVELOPMENT

Design Stunning Interfaces (UI/UX Basics to Pro)

Learn how to design beautiful and user-friendly mobile apps and websites using Figma for wireframing and prototyping, Illustrator for icons & vector graphics, and Photoshop for banners, images, and mockups.

Build Responsive Websites (Coding + Frontend Skills)

Turn your designs into real websites! Learn HTML, CSS, and Bootstrap to create mobile-friendly layouts, then level up with JavaScript and React to make your websites interactive and modern. Even if you're new to coding, we'll teach you from scratch — step by step.

Projects, Portfolio & Job Readiness

Work on real projects from Day 1 — design apps, build websites, and upload everything live. Create a professional portfolio on GitHub, Behance, and your own website. Get ready for jobs, internships, or freelance work with confidence and real skills.

TALLY & ADVANCE EXCEL

Tally Essential (Beginner to Intermediate)

Learn the core functions of Tally including company setup, ledger creation, vouchers, GST, and basic reports. Perfect for students and beginners in accounting.

Tally Professional (Advanced to Expert)

Level 1

Business Accounting & GST

Master advanced voucher entries, GST filing, and error handling in real scenarios.

Level 2

Payroll & Taxation

Learn salary setup, employee records, PF/ESI, and professional tax with compliance.

Level 3

MIS Reports & Automation

Generate smart business reports, balance sheets, cost centers, and automate repetitive tasks.

Advanced Excel for Professionals

Functions & Formulas: IF, VLOOKUP,

INDEX-MATCH, SUMIFS, etc.

Data Cleaning & Validation

Pivot Tables & Dynamic Charts

Dashboards with Slicers & KPIs

Conditional Formatting & Data Protection

Power Query & Power Pivot Basics

Macros & Automation (Basic VBA)

Excel for MIS & Reporting

CAD COURSES

AutoCAD | Revit Architecture | SketchUp |

3ds Max | V-Ray | Revit MEP |

SolidWorks | STAAD Pro | ArtCAM

Architecture Designing

Learn to create accurate building plans, layouts, elevations, and working drawings used in real-world construction projects.

Electrical Engineering CAD

Design detailed electrical layouts, panel wiring, and circuit systems used in residential, commercial, and industrial infrastructure.

Interior Design

Understand space planning, lighting, textures, and furniture placement to design beautiful and functional living and commercial spaces.

CNC Designing

Bring designs to life with stunning 3D visuals, realistic textures, lighting, and walkthroughs that showcase your creative vision.

Mechanical Engineering Design

Master the skills to design mechanical components, machines, and technical drawings essential for industrial and manufacturing processes.

3D Visualization & AI Rendering

Design scroll-stopping ad creatives using tools like Illustrator, Photoshop & AI tools (like ChatGPT & Copy.ai) to maximize conversions.

AI & IMAGE VIDEO GENERATION

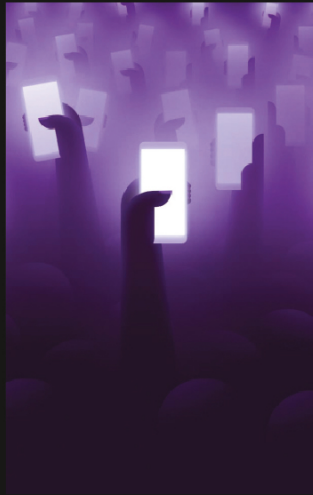

Eleven
Labs

AI Automation: Script, Voice & Edit

Automate your entire content workflow using ChatGPT for scripts, ElevenLabs for voiceovers, and Runway ML for editing. Save time, boost output, and scale effortlessly.

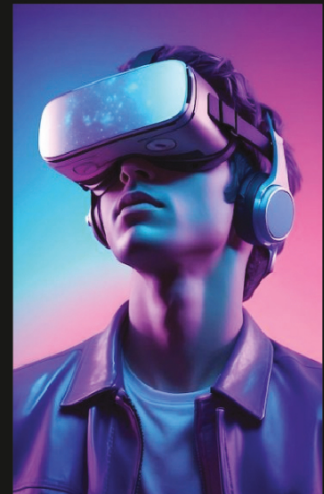

Design with AI: Images in Minutes

Generate stunning visuals with prompts using Midjourney and Adobe Firefly. Perfect for posters, branding, product ads, and social media creatives — no design skills needed.

AI Video & Audio Creation Mastery

Transform text into scroll-stopping videos using tools like Runway ML, Pika, and voice AI. Create reels, ads, and content without a camera or mic.

BLENDER & 3D DESIGN CRASH COURSE

Blender & 3D Design Masterclass

Learn the complete 3D creation pipeline — from modeling and texturing to animation, lighting, and rendering.

3D Modeling & Sculpting with Blender

Build professional-grade 3D assets, characters, and environments from scratch.

Lighting, Texturing & Realistic Rendering

Master materials, lighting setups, and render high-quality visuals using Eevee & Cycles.

Animation & Rigging for Creators

Learn to animate characters, add movement, and create cinematic scenes.

Blender for VFX & Motion Graphics

Create dynamic effects, simulations, and motion designs for video content.

GOVERNMENT COURSES

CCC – 3 Month Diploma

Computer Concepts for Beginners

Learn the basics of computers including MS Word, Excel, PowerPoint, Internet, Libre Office, and online tools. Perfect for beginners and government job aspirants.

O Level – 1 Year Course

Recognized IT Course

Covers Information Technology, Programming, Web & Graphic Designing, and Financial Accounting. Suitable for students aiming for IT careers or

RS-CIT – 3 Month Diploma

Rajasthan State Certificate in IT

Authorized course by RKCL covering essential computer skills like MS Office, Internet Applications, and digital literacy fundamentals.

COPA – 1 Year Diploma

Job-Focused IT Training

Learn Basic Computer Operations, Web Designing, E-commerce, Hardware, Software, and Tally. Best suited for 10th pass students.

PGDCA – 1 Year Diploma

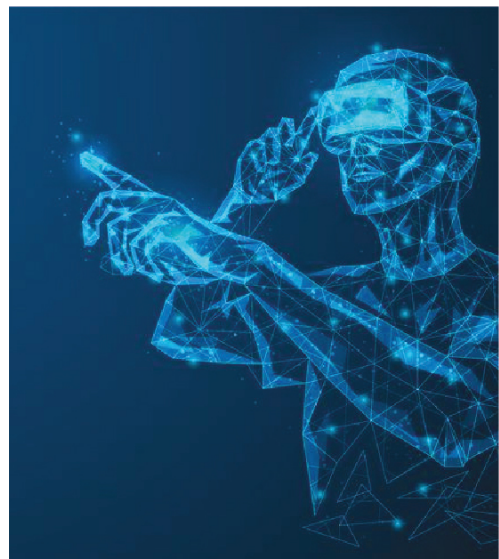

Advanced Computer Skills

Comprehensive course covering Computer Fundamentals, MS Office, Tally, C, C++, and Web Designing – ideal for graduates seeking professional IT skills.

BCA/MCA – Degree Course

Professional IT Degree

Degree course focused on Programming, Database Management, Mobile Computing, and Cloud Technologies. For students aiming for careers in IT and software development.

PERSONALITY DEVELOPMENT & SPOKEN ENGLISH

Fluent Speaking with Daily Practice Routines

Build spoken fluency with interactive speaking drills, roleplays, and topic-based conversations. Boost your confidence in real-life.

Reading & Listening for Real Comprehension

Sharpen your English understanding through story reading, podcasts, and practical listening exercises designed for daily improvement.

Accent Training with Global Communication Skills

Learn to speak clearly with correct pronunciation, intonation, and neutral accent — ideal for international jobs and global settings.

Interview & Personality Confidence Mastery

Prepare for interviews, group discussions, and public speaking with body language, confidence building, and personality development.

CAREER SCOPE & MARKET TRENDS
